

myOrthoRecruiter launched in 2021, under the already established brand of myMDRecruiter. myMDRecruiter already boasts a successful brand in myDermRecruiter, the #1 Dermatology Recruitment Firm in the Nation, established in 2014. The myOrthoRecruiter team focuses solely on orthopedics recruitment and specializes in finding surgeons as well as experienced advanced practice providers for private practices, regional and national health systems.

With over 20 years of recruitment power behind us, we have the network and resources you need to hire top talent!

Unlike other agencies, we focus 100% of our recruitment efforts on the field of Orthopedic Surgery, which means we understand your search like general recruiters can't. We know the nuances of regional and national hiring trends in Orthopedics and can provide you with insights to ensure your practice offers a package that is attractive and highly competitive to the candidates you want to hire.

Our clients regularly express how grateful they are that "we get it." Hiring managers can't have the same transparent discussions we can with a candidate. That straightforward communication with candidates allows us to determine what drives them personally and professionally, allowing us to confidently determine if they are the best match for your opening, culture, and mission.

myOrthoRecruiter is a contingency-based recruitment firm which means we don't receive compensation until we've successfully placed a talented provider with your practice.

It's a no-risk partnership!

There are no upfront costs to you. We spend thousands of dollars marketing your opportunity to candidates nationwide who are actively and passively seeking a new career as an Orthopedic Surgeon so you don't have to!
